INCENSES

In ancient times, incense was burnt because it was considered the intermediary between sky and earth, able to convey men's requests and prayers to deities, therefore it was also used in religious practices and for propitiatory purposes. It is the perfect companion for meditation, music, massage, artistic expression and astrological advice. A scented white thread able to make us lose the sense of time and grasp forgotten memories and sensations, in order to reconnect to universal harmony.

FIORE D'ORIENTE was founded in 1988, with the aim to revive the Art of the production of natural honey incenses, following the ancient Vedic tradition. Our production laboratory follows the Natural Home Fragrance Controlled by Ecocert Greenlife F32600 directives. Incenses, generally used to bring peace and serenity, must be pure, clean and sincere: hence, our work begins from the selection of natural raw materials. The main ingredients of our blends come from the uncontaminated Indian jungle, while the resins come from Indian, Arabic and African arid and desert lands, picked by nomad tribes. All our raw materials are certified and accompanied by Material Safety Data Sheets and Analysis Certificates.

Our Masalas stand out for the presence of powders of precious woods, essential oils, exclusive spices and resins in the honey blend, that make them unique in terms of aroma and quality and also for their soft and rubbery texture. The Masala is still prepared today as it was 400 years ago, following ancient Vedic teachings, lunar phases, the movement of the Sun and planets and thousands precious tips

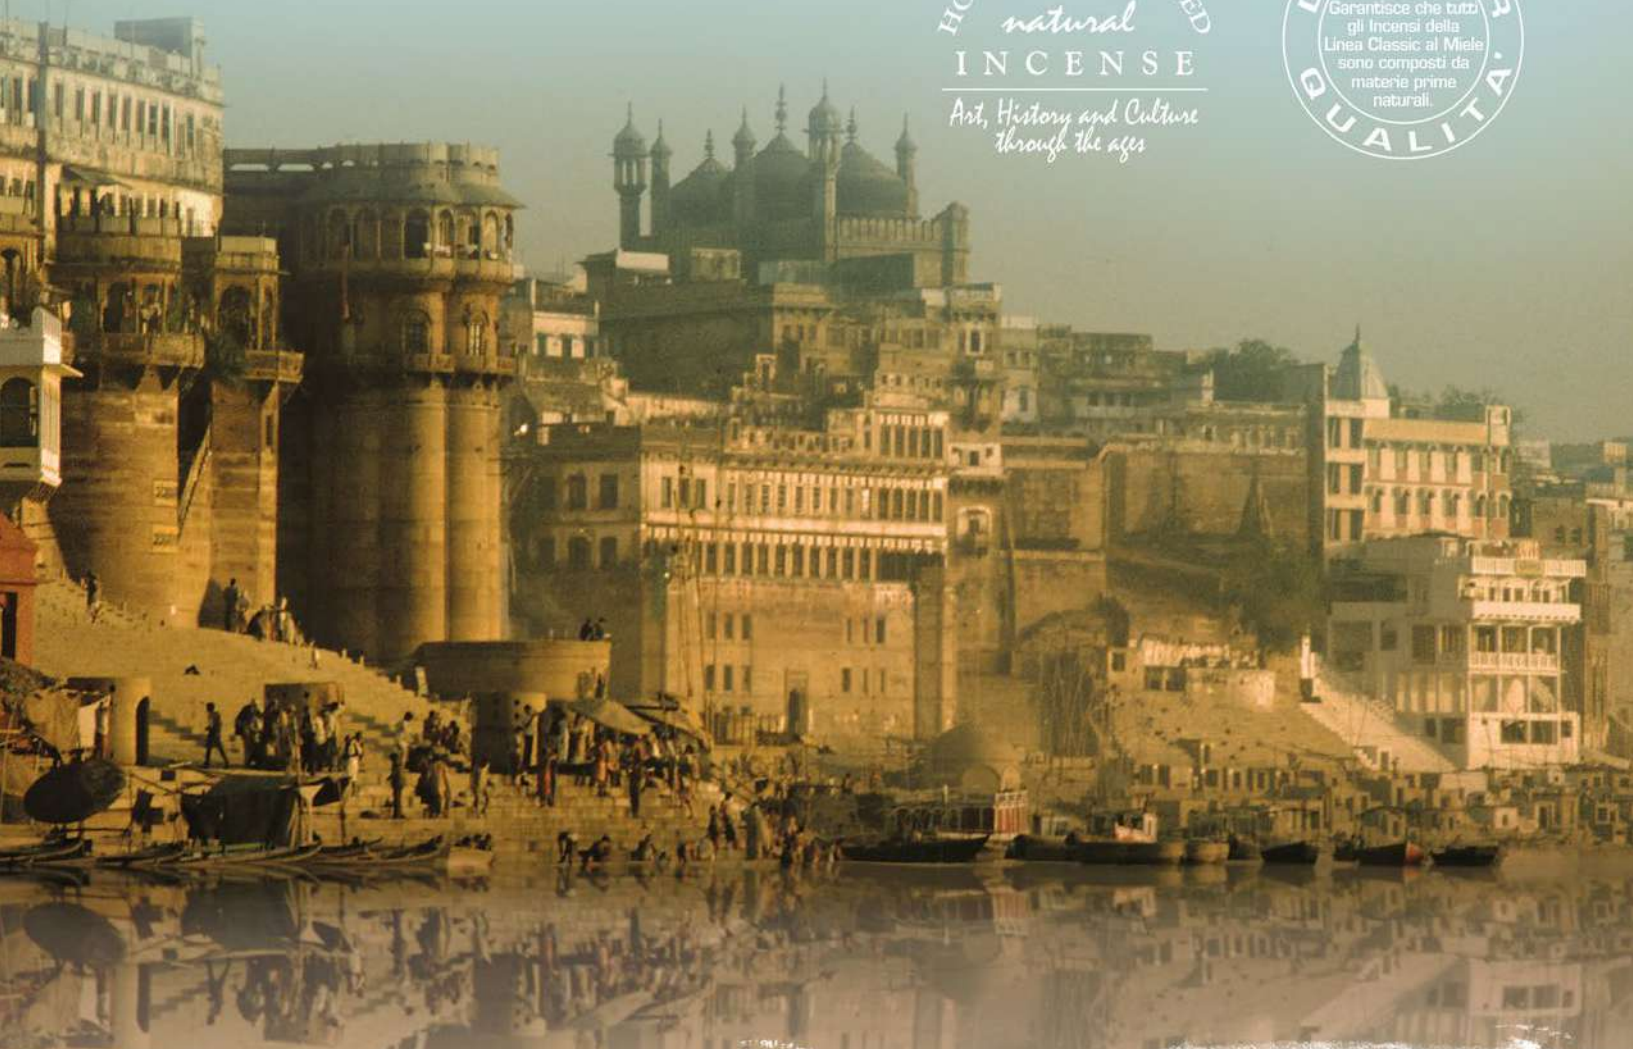

handed down from tradition.

The ingredients are secretly mixed at different times. During preparation, the masala is stored in terracotta recipients and after 15 days, the mix is ready to be skilfully wrapped by hand, on bamboo sticks. Drying takes up to one week and during those days, the sticks are constantly turned to dry evenly. Once dried, the sticks are immediately packed in precious sealed packs that retain the aromas, conceived over the years, which maintain unaltered the fragrance until consumption.

Fiore D'Oriente, in addition to the production of aromatised sticks, is constantly involved in researching new "notes", new vibrational fragrances, trying to combine tradition and experimentation in line with the principles underlying its choices. Our researches led us to the creation of a series of lines of Vibrational Incenses: the incenses for the Chakra, those for Yoga, Reiki, the Archangels and the "Marco Polo's Treasures" line. The name was not given randomly. To produce these incenses, we travelled and are still travelling the ancient Incense route. Indeed, the resins used to produce the sticks come from the same areas where the ancient merchants of the Incense Route used to stock up. These extremely ancient resins, in addition to boast the typical properties of every resin, are able to stir old memories, those related to our grandparents, thus connecting us with distant memories for a few moments. 100% of the total ingredients are from Natural Origin.

TRADITIONAL HONEY'S INCENSES

The selected fragrances are the symbol of past and present, with their varieties. Ancient mixes consisting of dozens of ingredients join new single-flower masala blends, unique in their kind. This incense collection satisfies any need thanks to the assortment of 21 fragrances

that vary from sweet to floral, spiced to balsamic, from the classic incense to vibrational incense. Produced exclusively with natural raw materials, they are sold in our traditional bookmark-packs, contained in sealed eco-bags.

INCENSE ROAD

Marco Polo's Treasures is a line of hand-made entirely natural incenses. 100% of the total ingredients are from Natural Origin. The major ingredients of our paste originate in the pristine Indian jungle, whereas the resins come from the arid desert territories of India, Arabia and Africa and are picked by nomadic tribes. All our raw materials are certified and accompanied by Material Safety Data Sheets and Certificates of Analysis. Our incense sticks are used for purification and realignment with our primordial experiences and past ancestral memories. They are an excellent tool for overcoming, albeit for a short time, the space-time barrier. Incense has always been used for prayer, yoga, meditation, purification and religious rituals of every kind and in every place. A stick of incense is a tool that helps us to connect to our Self, to our divinity, as a thought towards our loved ones and it is an offering to God. An incense stick is an integral part of our experience and therefore must be absolutely pure.

Usage and Considerations

The function of Marco Polo's Treasures incense is different from that of other aromatic incense. Most of the incense being sold today is designed to perfume the environment, and is thus manufactured with little attention to the effects that the ingredients have on one's health. Marco Polo's Treasures incense, however, is made with attention to the beneficial effects that the natural ingredients have on the body, mind and spirit.

Marco Polo's Treasures incense is made exclusively from 100% pure resins and prized woods without the use of chemical or petroleum-based perfumes.

At present there are two general types of incense on the market: One to perfume the environment, and another completely natural

formulation that scents the environment and, moreover, makes use of the curative properties of the resins and woods used in its production. This is the incense that many people wanted but never managed to have because of the widespread use of chemicals. Marco Polo's Treasures gives you this incense, and a whole different way to use it.

We have selected the resins and woods for our incense by examining the characteristics of ingredients in the official European pharmacopoeia. Because the ingredients are natural, this type of incense performs its actions even when one doesn't perceive the individual components. There are resins like *Canarium strictum*, *Benzoin*, or some varieties of *Olibanum* that don't have a significant aroma but still carry out their actions in the air and inside us. Other mixtures, composed of woods or resins like *Palo Santo*, *Black Storace* or *Cinnamon*, are much more aromatic. In the natural world, the efficacy of a substance is not related to whether or not it is inherently aromatic.

We don't see the spoken word but we hear it; we don't see energy but we feel it and see the work it does; the universe holds all the sounds that have been produced, even though we don't manage to perceive most of them. Our incense works in the same way. We don't strive to create perfumes for the environment, but to transform the best raw materials into a product to be used for holistic purposes.

The fragrance of the first stick of our incense may not be what one expects, but with a bit of faith and time the olfactory sense becomes refined and can better appreciate the aromas. This type of incense was created not to show, but to BE; not to amaze, but to leave one amazed. Our formulations help with purification, concentration, the nervous system, prayer, and introspection.

Benzoin Siam
Styrax Benzoin
10 Sticks (20gr) - Cod. MP801

Black Styrax
Liquidambar Orientalis
10 Sticks (20gr) - Cod. MP815

Provenienza: Lo Styrax benzoin è un albero di notevoli dimensioni (alto fino a venti metri) che vegeta esclusivamente in Asia tropicale.
Forma: Resina rossastra che indurisce con l'aria e il sole.
Impieghi: In Oriente si ritiene da migliaia d'anni che le fumigazioni prodotte bruciando la Gomma di Benzoino allontanino dalle mura domestiche qualsiasi avversità usata anche come portafortuna.
In Cina, fu utilizzata per millenni a scopi medicinali (digestivo, antisetico, etc.). Stimola la Sensualità ed ha un effetto rasserenante.

Origin: A plant with a tall stem that grows in the impenetrable anatomic forests of Marmaris Turkey and South America.
Form: Even today production is carried out according to the original procedures: The plant produces a dense resinoid serum. This is combined with the bark of the trunk (previously shredded); the blend is then then buried for a few months. The resulting maceration produces the black.
Uses: Having an unmistakable amber and sweet aroma; used for millennia for its optimistic and redeeming properties

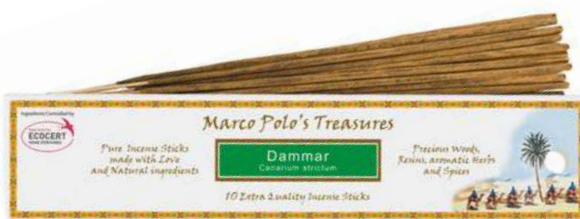

Cinnamomum
Cinnamomum Zeylanicum

10 Sticks (20gr) - Cod. MP802

Origin: Sri Lanka
Form: Bark
Uses: There are many therapeutic properties of cinnamon which were already known in ancient Egypt including antibacterial, antiseptic, stimulant and digestive properties. Cinnamon stimulates the immune system. In Ayurvedic medicine and in traditional Chinese medicine it is used for disorders related to cold, as it has a warming effect. Already in ancient Rome cinnamon was being presented as an aphrodisiac spice by the Romans. Cinnamon is highly aromatic and has a stimulating effect..

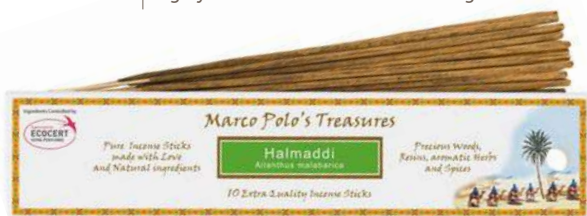

Dammar
Canarium Strictum

10 Sticks (20gr) - Cod. MP803

Origin: India, a tree that grows up to 40 meters in height, in high altitude.
Form: Resin
Uses: In Malay language the term Dammar means "light". The use of this resin has the power to enlighten and brighten dark corners of the soul; useful for combating sadness, melancholy and depression. Calming.

Halmaddi
Machilus Macrantha

10 Sticks (20gr) - Cod. MP805

Origin: Machilus Macrantha is a tree that grows in Karnataka forest, southern India. It is called Heaven Tree by the indigenous tribes.
Form: Bark and Resin
Uses: Very delicate and pleasant aroma.

Olibanum Arabia
Boswellia Carteri Arabia

10 Sticks (20gr) - Cod. MP809

Origin: From the oldest ports of the Red Sea. The alluring and unmistakable aroma is due to the strict selection of the Boswellia carteri plantations from which it is extracted.
Form: Natural resin, brown solid masses resembling sugar.
Uses: Used for millennia in purification rites.

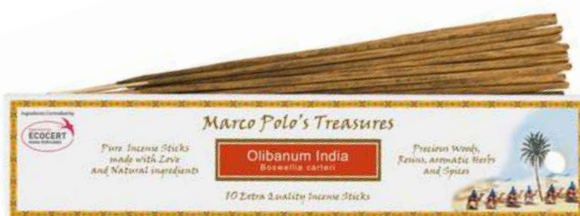

Olibanum Etiopia
Boswellia Rivae

10 Sticks (20gr) - Cod. MP810

Origin: Desert highlands of southern Ethiopia (near the region that saw the dawn of Homo sapiens).
Form: Natural resin, brown solid masses resembling sugar.
Uses: Used for millennia in purification rites.

Olibanum India
Boswellia Carteri India

10 Sticks (20gr) - Cod. MP807

Origin: India
Form: Natural resin, brown solid masses resembling sugar.
Uses: Used for millennia, for purification Rites

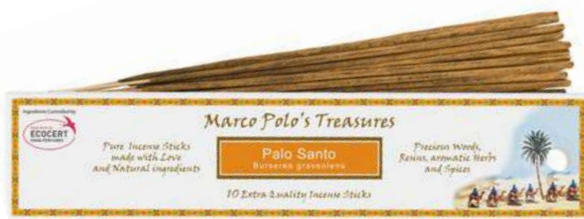

Olibanum Migiurtino Boswellia Frereana

10 Sticks (20gr) - Cod. MP811

Origin: It has always been known for its surprising ability to thrive on steep rocky walls; this plant is typically found on the gently sloping plateaus on the border between Ethiopia and Somalia.
Form: flakes of resin-soaked wood.
Uses: Used for millennia in purification rites.

Palo Santo Burserea Graveolens

10 Sticks (20gr) - Cod. MP814

Origin: Ecuador
Form: Wood
Uses: This tree has been used since ancient times, including by the Incas, as a remedy for spiritual purification and to clear spaces of negative energy. It repels mosquitoes and flies. It is an anti-anxiety and anti-depressant. It harmonises body, mind and spirit and helps restore inner balance. For this reason it is called "the scent of the soul".

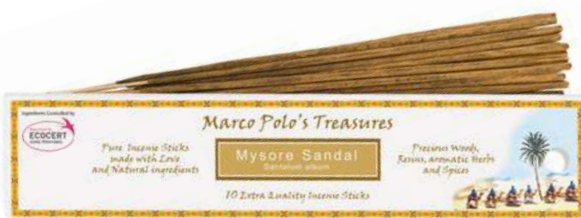

Red Mirrha Commiphora Myrrha

10 Sticks (20gr) - Cod. MP812

Origin: A shrub that reaches ten meters in height and grows exclusively in eastern Africa and on the Arabian peninsula.
Form: Myrrh is a natural oleoresin and is solidified upon contact with the air and sunlight.
Uses: For centuries it has been used as an anti-inflammatory and healing remedy. According to ancient ayurvedic medicine, this resin brings inner peace, rejuvenates and revitalises the mind, purifies the aura and dispels distracting factors during times of meditation and prayer.

Sandal Santalum Album

10 Sticks (20gr) - Cod. MP816

Origin: Mysore India
Form: Wood
Uses: Sandalwood has deep spiritual significance. Ancient East Indian cultures believe spaces infused with sandalwood are always protected from the forces of evil. Long recognised for its anti-depressant and aphrodisiac properties, sandalwood is best known for bringing peace to the soul.

Three Kings

10 Sticks (20gr) - Cod. MP813

Ingredients: Sandal, Olibanum, Benzoin, Cinnamomum, Halmadhi, Red Mirrha, Kampuram, Black Storace.
Form: Resin - Woods - Spices.
Uses: All uses.

YOGA INCENSES

Shuddi (Purification) - Patanjali talks about "impurities" and the importance to eliminate or reduce impurities and discomforts that affect the body, mind and spirit in order to allow the interior light of our knowledge to shine!

Samadhi - This stage includes the superior level of spiritual progresses, from the first Samadhi to the Union with Primordial Knowledge in the Home of the Creator.

Dharma - The term Dharma derives from Sanskrit root dhr, which translates into English as "providing a base", or "foundation of reality", "truth", "moral obligation", "fairness".

Shanti - Sanskrit word Shanti, indicates a state of absolute interior peace and serene imperturbability, characterised by the absence of frenetic thinking-waves (vritti) generated by the mind.

OM (Ohm) - is the most sacred mantra which represents the Hindu religion, it is considered the primordial sound that gave origin to creation. According to Hindu books, Aum mantra is the synthesis and essence of each mantra, prayer, ritual, sacred text, celestial being or Divine aspect.

Prana - Sanskrit term Prāṇa, literally means vital breath or cosmic energy. According to the Hindu philosophy, all living beings, through breathing, create an inter-exchange between external world and the individual internal world. The inhaled Sanskrit is assimilated by the Chakras through energy channels called Nadi.

Surya Namaskar (Sun Salutation) - Sequence of Hatha Yoga exercises aimed at reaching and maintaining an optimal psycho-physical state. "Keep your face towards the full sun and you won't see the shadow".

THE CHAKRA REBALANCING SYSTEM

THE CHAKRA SYSTEM

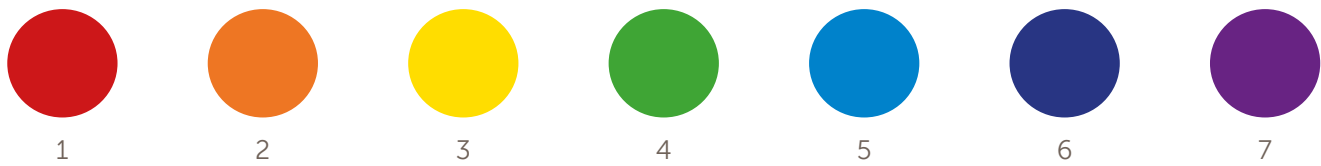

The Chakra System embodies the energy we use to live, love, work, play, study, meditate and all our daily activities. Each Chakra is linked to specific areas of the brain and parts of the body. The Chakra System is of basic importance to our well-being. Everything will run smoothly when it is balanced but one unbalanced chakra or more will affect our body and mind till it degenerates and leads to complex diseases. We can rebalance a stressed situation only if we identify the stressed or unbalanced Chakra. Based on a long term committment to this ancient holistic discipline based on many years of research and practised expertise Fiore D'Oriente has created a complete Chakra system known as The Chakra Rebalancing System (CRS). CRS is a natural method to fully rebalance the Chakra easily and effectively. CRS allows you to check and treat your Chakras at home. Fiore D'Oriente Chakra Test and Natural Vibrational Perfumes provide

specific information to help you in applying this system. Why should we choose Vibrational Perfumes? Because they have been used for hundreds of years and experiments have proved that pharmaceutical drugs do not rebalance chakras. Chakras may be rebalanced by vibrations, working through attraction and reaction. Master-made perfumes as well as positive thinking prompt good vibrations. But also music, yoga exercises and colors start vibrations. If we know the vibrational range of the unbalanced chakra we shall look for the relative vibration, whatever the source may be. This is all about The Chakra Rebalancing System.

DIAGNOSIS AND METHODS

There are several ways to use the Chakra Rebalancing System, including the following:

1 CHAKRA TEST	2 SELECTION ON THE BASIS OF THE SITUATION	3 CHOICE BASED ON COLOR
 <p>To have a chakra test is the best and complete way (see Diagnostic Chakra Test)</p>	<p>We can protect or activate the interested chakra depending on the situation (see Suggested Daily Usage)</p>	<p>Simply stand in front of the Chakra Rebalancing System counter display and choose the products based on the color that most attracts us.</p>

CHAKROIL

10 ml

Chakroil are the 7 vibrational oils of the Chakras and like all our products of the "Chakra Rebalancing System" they take their name from the reference chakra. The blends, prepared scrupulously following the ancient natural holistic medicine teachings are composed of essential oils of the highest quality "OROIL" blended with Jojoba Oil – cold pressed. A very complex and laborious preparation makes these oils a high value vibrational instrument. A constant application on the areas corresponding to each chakra (2-3 drops, three times a day with a light massage) is indispensable

for a good harmonization of our energy system. The oils can also be applied under the sole of our feet (especially the first chakra), and on the ankle of the Achilles tendon (the second chakra). In addition, the Chakroils are also applied on the forearm, so to make the vibrational impulse constant to our psychophysical receptive structure (aromatherapy).

100% Organic

INFUSIONS FOR THE CHAKRAS

50 gr

Mantenere equilibrati i nostri Chakra è importante, per questo It is important to keep our Chakras balanced, therefore we must work of multiple aspects, constantly implementing all the resources available: Yoga, Mantra, Statements, Colours, Scents, Foods and Beverages. The Infusions for the Chakras are an excellent tool to rebalance our Energy System. The blends are made exclusively with plants coming from high-quality organic cultivations. Fiore D'Oriente follows the entire production chain, from the seed bank up to the packaging in sealed packs, to preserve them from any contaminations and bring them to us fresh, as just harvested.

The Infusions for the Chakras are available in 100 gr Infusion bags. In the Infusion bags, the leaves dry and shred naturally, retaining most of their properties, differently from Tea Packs, where the leaves are shredded in 1/1.5 mm fragments, losing most of their benefits. The classic filter is certainly the most practical however, if we want to work on ourselves, you should choose the bulk Infusion bags and simply use a strainer or a common teapot. We offer empty Infusion bags of various sizes that you can simply fill and purchase.

CHAKRA MASSAGE OIL

100 ml

They belong to "The Chakra Rebalancing System" Line. They are massage oils for the body, conceived for Rebalancing the Chakras. After a careful diagnosis carried out with Fiore D'Oriente "Chakra Test", apply the "Chakra Massage Oil" on the body, rubbing it gently

until complete absorption. Made with Jojoba, the Vibrational Blends of the 7 Chakras at 3%, generate a constant and light vibration to rebalance the Chakra to treat.

CHAKRA SOAP

70 gr

The rebalancing begins in the morning after we wake up. Let's start with the right vibration! The Chakra Soaps can be used for bath or shower on all your body. The vegetal chakra soaps are hand made following ancient traditions. The cold soap-making process produces natural glycerine, which makes the soap creamy and emollient.

Thanks to the medicinal herbs, the soaked oils, the olive oil (30%) the palm and coconut oils these soaps nourish and hydrate your skin. The substantial content of natural essential oils "OROIL", gives the Chakra Soaps recognized rebalancing properties.

Dhoop

DHOOP INCENSES

Dhoop is an incense line created using very first choice blends, composed of precious woods and resins.

This kind of dough does not include the use of bamboo. Dhoop Incenses are composed of 45% resin, herbs and precious woods as declared on the labels. They generate an intense and persistent incense. Each box, glued by hand, contains a mini resin incense holder.
